

MULCHING HEAD

MH60D

SPECIFICATIONS

- Remove up to 8-inch trees and 12-inch stumps. Shred underbrush and woody materials into beneficial mulch in minutes.
- Two-speed hydraulic system efficiently uses available horsepower. When preset pressure level is attained, the motor automatically shifts to a higher displacement, increasing torque for reduced stalling and faster rotor-speed recovery time.
- 30 double-carbide-tipped teeth take big bites out of trees and stumps to deliver superior large-material knockdown. Also work well below soil level for chewing out stumps. Optional knife tools that allow smoother cutting and finer chip size increase productivity.
- 60-inch high-capacity, smooth rotor design reduces material drag and horsepower requirements. Rotor is balanced for smooth operation, and oversized 2.5-inch sealed rotor bearings deliver long-term durability.
- Redesigned mulching chamber enables more efficient material flow and reduces wear points, for optimized shredding performance. Internal counter combs help shatter incoming material, creating finer mulch.
- Prominently positioned pressure gauge lets operators easily monitor hydraulic operating pressure.
- Heavy-duty push bar topples trees or brush and helps protect the carrier. Three-position adjustable push bar increases versatility and visibility.
- Heavy-duty mulching door traps material in mulching chamber for finer processing. Door cylinder inside frame body is better protected.
- Enhanced frame construction and bolt-on skid shoes reduce debris buildup and extend wear life and durability.
- The MH60D mulching head is optimized to work with John Deere skid steer loaders (SSLs) and compact track loaders (CTLs). It's also compatible with most competitive models.
